Coatings for On- und Offshore:

8 years successful cooperation with Lürssen shipyard in Bremen/Germany www.ceramic-polymer.de

The first priority of the traditional Lürssen shipyard in Bremen in respect of building special vessels, modern marine ships and classy premium yachts, is the most possible quality and absolute customer satisfaction.

For more than 8 years we cooperate with Lürssen shipyard very successfully. With our coating systems we essentially contribute to fulfill their high standard.

Our product **Ceramic-Polymer SF/LF** is used constantly for

- ✓ **Ballast-water-tanks**
- ✓ **Fresh-water-tanks**
- ✓ **Waste-water-tanks**
- ✓ **Pool-water-tanks**

on the high class ships.

Due to the outstanding physical properties, our corrosion protection systems qualify perfectly for the internal coating of tanks and satisfy extremely high requirements. Based on independent laboratory tests, we can verify excellent results. Recently the corrosion resistance of **Ceramic-Polymer SF/LF** was confirmed by a 10.000 hours salt spray test according to ASTM B117 / DIN EN ISO 9227.

Coatings for On- und Offshore:

Cooperation with NITC (National Iranian Tanker Company)

The NITC in Tehran/Iran is the biggest tanker company in the Middle East and specialized with 25 tanker vessels on transport of crude oil and hydrocarbon products.

*For the coating of major parts of the pipework on board of the tankers our product **Ceramic-Polymer SF/LF** is used effectively.*

The excellent resistance of our coatings against chemical attack and abrasion service provides permanent corrosion protection in the oil sector as well as for the storage of aggressive chemicals.

We appreciate to answer your technical questions and provide you the ultimate coating solution for all tank and storage projects!
