www.ceramic-polymer.de

From now on we offer the ideal basis for the manifold concrete protection systems of our ARC- and CP-coating lines. Our previous primers were significantly improved. With CP-Synthofloor 8010 Plus and CP-Synthofloor 8016 Plus you obtain prime coat products without addition of benzyl alcohol; the VOC content is lower than 1 %, they are practically emission-free!

The optimum base for each concrete coating – Advantages of our new primers

- » VOC content < 1 %, free of benzyl alcohol
 - practically emission-free
- » Safe application
 - no harmful evaporations
 - no unpleasant odors during use
- » Versatile use
 - as primer and key coat
 - on „green“ concrete and concrete with residual moisture of max. 6 %
- » Excellent mechanical resistance
 - high compressive strength
- » Excellent chemical resistance
 - resistant against water/sewage, alkalis, mineral oils, saline solutions, diluted acids, lubricants and fuels

The extensive possibilities of our industrial concrete- and flooring systems

In our portfolio we provide high-quality systems for various concrete protection.

With our innovative primers you receive the environmentally friendly base for following industry sectors:

- » Waste water basins, sewage pipes
- » Concrete drip pans, Secondary Containment application
- » Septic tanks, oil and petrol separators
- » Industrial floors for heavy duty traffic
- » Anti-skid floors
- » Production floors with antistatic effects
- » Chemically resistant floorings
- » Floors for highly hygienic demands

**With our coatings you stand on solid ground.
Do you have questions regarding our new prime coats?
We gladly support you with technically competent advice!**
